

Please amend the application as follows:

In the Claims

*Please amend Claims 14. Amendments to the claims are indicated in the attached "Marked Up Version of Amendments" (page i).*

- Sub  
FI
14. (Four Times Amended) A portable display system comprising:
- a housing;
  - an active matrix liquid crystal display mounted to the housing, the liquid crystal display including an array of pixel electrodes, a display control circuit that actuates the pixel electrodes to present an image on the display, and a light source that illuminates the image and is connected to the display control circuit, the display control circuit including a switching circuit that switches a common voltage applied to the liquid crystal display, and a timing circuit that determines when the display control circuit actuates the pixel electrodes to present an image, and flashes the light source to illuminate the image, and when the switching circuit switches the common voltage applied to the liquid crystal display to erase the image;
  - a lens that magnifies the image on the display; and
  - a card reader positioned within the housing, the card reader operating at least at 15 MHz and receiving video input to be presented on the display from a card that docks with the card reader.

REMARKS

Claims 14, 16, 17, 25-29 and 37-39 are pending in the application. All claims have been rejected. This amendment is offered to place the application in better condition for allowance and to narrow the issues for appeal.
